Work & Job Interviews

Vocabulary, useful phrases, grammar, writing and conversation practice

Level A2-B1 · 45-60 min · Lesson 06

LESSON GOAL

By the end of this lesson, you should be able to introduce yourself professionally, describe your experience and responsibilities, talk about strengths and achievements, answer common interview questions, and ask intelligent questions about a job.

Learn the vocabulary first, then practise the interview structures and grammar. Finish by opening the Conversation Lab and completing a realistic job interview from beginning to end.

Communication goal

You do not need complicated vocabulary to sound professional. Clear structure, specific examples, and natural phrases usually make a stronger answer than long or memorized sentences.

3. What project or achievement are you most proud of?
4. What interview question is hardest for you to answer in English?

Before you continue

Answer the four questions in English using short sentences. At this stage, focus on ideas and vocabulary - not on producing a perfect interview answer.

GRAMMAR

Present perfect vs. past simple for experience

Interview answers often move between general experience and one specific example. These two tenses help you make that distinction clearly.

TENSE	EXAMPLE	USE
Present perfect	I have worked with data analysis.	general experience up to now
Present perfect	I have led several student projects.	experience without a finished past time
Past simple	I led a project last semester.	one finished event at a specific time
Past simple	I reduced processing time by 10% in my internship.	a completed result in the past
Both together	I have worked on several projects. Last year, I led one focused on logistics.	general experience + specific evidence

Natural interview pattern

Start broad, then prove it: "I have developed strong teamwork skills. For example, last year I coordinated a project with students from three different areas."

Mini practice

Complete: I have _____ on several improvement projects.

Choose: Last year, I have led / led a student team.

Choose: I have developed / developed strong analytical skills over the last few years.

Combine: I have experience with presentations. + Last month I presented a project to senior managers.

MODEL DIALOGUE

A job interview

Read once for meaning. Then read again and notice how the candidate answers with a clear point, a concrete example, and a result.

INTERVIEWER Thanks for joining us. Could you start by telling me a little about yourself?

CANDIDATE Of course. I am currently studying engineering, and I am especially interested in projects that combine analysis, problem solving, and teamwork. I have worked on academic and professional projects where I used data to support decisions and improve processes.

INTERVIEWER What would you say is one of your main strengths?

CANDIDATE One of my main strengths is adaptability. I learn quickly when I enter a new environment, and I like to understand how the whole process works before proposing changes.

INTERVIEWER Can you give me an example?

CANDIDATE Yes. In one project, I had to work with information from several areas. I organized the data, spoke with the people involved, and created a clearer way to track the process. As a result, the team could identify problems faster.

INTERVIEWER Tell me about a challenge you faced.

CANDIDATE A challenge I faced was working with an unclear process and limited information. I first mapped what was happening, then identified the most important variables and discussed them with the team. That helped us decide what to improve first.

INTERVIEWER Why are you interested in this role?

CANDIDATE Because it combines learning, responsibility, and real business problems. I would like to contribute with my analytical skills while developing a broader understanding of the company.

INTERVIEWER Do you have any questions for me?

CANDIDATE Yes. What would success look like in the first six months, and what are the main priorities for someone starting in this position?

Answer structure to copy

POINT → EXAMPLE → RESULT. Say the main idea first, give one concrete situation, and finish with what changed, what you learned, or what you delivered.

WRITING PRACTICE 01

Build professional sentences

Translate the sentences into English using the vocabulary and structures from this lesson.

1. Eu tenho experiência com análise de dados.
2. No meu último projeto, eu fui responsável por organizar as informações.
3. Um dos meus principais pontos fortes é a adaptabilidade.
4. Eu aprendo rápido em ambientes novos.
5. Eu trabalhei em um projeto de melhoria no ano passado.
6. Eu liderei uma pequena equipe durante o projeto.
7. O principal desafio era cumprir o prazo.
8. Eu analisei os dados antes de tomar uma decisão.
9. Como resultado, reduzimos o tempo do processo.
10. Eu gosto de assumir responsabilidade pelos meus projetos.
11. O que seria considerado sucesso nessa função?
12. Quais são as principais prioridades nos primeiros meses?

WRITING PRACTICE 02

Write your “Tell me about yourself” answer

This is one of the most common interview questions. Your answer should be organized, relevant to the role, and short enough to say naturally.

Task: Write 100-140 words answering “Tell me about yourself.” Include your current situation, your main areas of experience, one or two strengths, a concrete example of something you have done, and what you are looking for next.

Try to include at least 6 of these:

- I am currently...
- My background is...
- I have experience in...
- One of my strengths is...
- For example...
- I worked on...
- As a result...
- I learned...
- I am especially interested in...
- I am looking for...

Simple structure

NOW → PAST → FUTURE. Start with who you are now, connect that to relevant experience, and finish with why the next opportunity makes sense for you.

Self-check before you finish

- ☐ Is my answer focused on professional information?
- ☐ Did I include at least one concrete example?
- ☐ Did I mention a result, learning, or responsibility?
- ☐ Can I say this naturally in about 60-90 seconds?

CONVERSATION PRACTICE

Role-plays for the AI coach

Open the Conversation Lab and ask the AI to act as the interviewer. Complete each situation before asking for feedback or corrections.

Role-play 1 · First interview

The AI is a recruiter for an entry-level position. Answer: Tell me about yourself, Why are you interested in this role?, What are your strengths?, and Tell me about a challenge you faced.

Role-play 2 · Behavioral interview

The interviewer asks for real examples about teamwork, leadership, problem solving, a mistake, a difficult deadline, and a time you had to learn something quickly. Use Point → Example → Result.

Role-play 3 · Final interview

The AI is a manager. Discuss your motivation, how you work with other people, how you prioritize tasks, what you want to learn, and then ask at least three thoughtful questions about the role and team.

Interview questions to practise

- Tell me about yourself.
- Why do you want this role?
- What is one of your main strengths?
- Tell me about a time you solved a problem.
- Tell me about a time you worked under pressure.
- What is one area you are currently developing?
- Why should we choose you?
- Do you have any questions for us?
